

GRID Alternatives SOLARTHON 2008

Volunteer Name: _____

With energy costs continuing to rise, and the environmental costs of our current energy sources becoming clearer every day, the time is now for solar power in our community. On June 28th, 2008 I'm volunteering with GRID Alternatives to help install eight solar electric systems for local low-income families, while raising money to support renewable energy for communities in need. For more information please visit www.gridalternatives.org/solarthon.

I need your help! My fundraising goal for this project is \$_____.
